

Inductive Specification

Exercise 1.1

1. $\{3n + 2 \mid n \in \mathbb{N}\}$

Definition (top-down) *A natural number n is in S if and only if*

1. $n = 2$, or
2. $n - 3 \in S$.

Definition (bottom-up) *Define the set S to be the smallest set contained in \mathbb{N} and satisfying the following two properties:*

1. $2 \in S$, and
2. if $n \in S$, then $n + 3 \in S$.

Definition (rules of inference)

$$2 \in S$$

$$\frac{n \in S}{n + 3 \in S}$$

We generate some elements of S .

1. $2 \in S$.
- 2.

$$\frac{2 \in S}{(2 + 3) \in S}$$

- 3.

$$\frac{5 \in S}{(5 + 3) \in S}$$

$$2. \{2n + 3m + 1 \mid n, m \in \mathbb{N}\}$$

Definition (top-down) *Natural numbers n, m are in S if and only if*

$$1. n + m = 1, \text{ or}$$

$$2. n - 2 \in S, \text{ or}$$

$$3. m - 3 \in S.$$

Definition (bottom-up) *Define the set S to be the smallest set contained in \mathbb{N} and satisfying the following three properties:*

$$1. 1 \in S, \text{ and}$$

$$2. \text{ if } n \in S, \text{ then } n + 2 \in S, \text{ and}$$

$$3. \text{ if } m \in S, \text{ then } m + 3 \in S.$$

Definition (rules of inference)

$$1 \in S$$

$$\frac{n \in S}{(n + 2) \in S}$$

$$\frac{m \in S}{(m + 3) \in S}$$

We generate some elements of S .

$$1. 1 \in S.$$

$$2.$$

$$\frac{1 \in S}{(1 + 2) \in S}$$

3.

$$\frac{3 \in S}{(3 + 2) \in S}$$

4.

$$\frac{5 \in S}{(5 + 2) \in S}$$

We could have derived $7 \in S$ in a different manner.

$$\frac{\frac{1 \in S}{(1 + 3) \in S}}{(4 + 3) \in S}$$

3. $\{(n, 2n + 1) | n \in N\}$

Definition (top-down) *A pair p of natural numbers n is in the set S if and only if*

1. *the first*
